

Detailed Outline

Safety for the Long Haul Large Truck Crash Risk, Causation, & Prevention

Ronald R. Knipling, Ph.D.

Published by the American Trucking Associations

Available at atabusinesssolutions.com

Front Matter:

- Title Page
- Dedication page
- Preface + Disclaimers
- Table of Contents

(1) Introduction & Overview [30 pages]

- 1.1 Purpose & Approach
- 1.2 The Importance of Commercial Transport & Safety
 - Trucking: America's Economic Wheels
 - Human & Economic Significance of Large Truck Crashes
 - Decades of Safety Improvements
- 1.3 Crash Problem Size: Trucks Compared to Other Vehicle Types
- 1.4 Major Characteristics of Truck Crashes
 - Conditions of Occurrence
 - Crash Severity & Victims
 - Three Distinct Crash Categories
 - Large Truck Overinvolvement in Fatal Crashes: Fallacy & Fact
- 1.5 Concepts of Crash Risk & Causation
 - Crash vs. accident
 - What kind of safety is it?
 - Truck safety is multidisciplinary
 - Multiple Interacting Factors
 - Risk vs. Cause
 - Cause & Fault
 - Prominent crash risk factors & proximal causes
 - Crash factors & causes as a chain
 - Generalizations About Crashes: False & True
 - Safety as a professional aspiration.
 - COMMENTARY: Gov. Bill Graves: *ATA's Commitment to Safety*

(2) The Science of Safety [36 pages]

- 2.1 Experimentation
- 2.2 Crash Databases
 - Fatality Analysis Reporting System (FARS)
 - General Estimates System (GES)
 - Motor Carrier Management Information System (MCMIS) Crash File
 - What's Missing From These Crash Files?
- 2.3 The LTCCS & Other Investigative Studies
 - LTCCS Design & Methodology
 - LTCCS Data Variables
 - Weaknesses of the LTCCS
 - Other Crash Causation Investigative Studies

- Commentary: Gordon Lambert, C. R. England; *Putting Safety Research and Statistics to Work*
- 2.4 Case-Control & Correlational Studies
 - Case-Control Studies
 - The Odds Ratio
 - Correlational Studies
 - Correlation Coefficients
- 2.5 Naturalistic Driving (Instrumented Vehicle) Studies
 - The Technology of Naturalistic Driving
 - What is Captured & Analyzed?
 - Why the Interest in Incidents?
 - Major Naturalistic Driving Studies
 - Uses of Naturalistic Driving Data
 - Is Seeing Believing?
- 2.6 Surveys
- 2.7 Methods of Safety Science: Summary Comparisons

(3) Driver Risk [46 pages]

- 3.1 Personal vs. Situational Risk Factors
- 3.2 Differential Driver Risk & The “High Risk” Driver
 - Driver Risk: Fixed, Random, or In-Between
 - Separating Chance Variation from Real Risk Variation
 - The Distribution of Driver Risk
 - Population Profile: “Normal” or Skewed?
 - What Causes Differential Driver Risk?
- 3.3 Driver Age
- 3.4 Driver Gender
- 3.5 Physical & Sensory-Motor Abilities
- 3.6 Medical Conditions & Health
 - Overview: Health Effects on Safety
 - Physical Qualifications for Commercial Drivers
 - Cardiovascular Illness
 - Sleep Apnea & Other Sleep Disorders
 - Diabetes
 - Epilepsy
 - Obesity
 - Psychiatric Illness
 - Other Medical Conditions Relevant to Driving Safety
- 3.7 Personality
 - “Accident Proneness”
 - Personality Dimensions Most Related To Safety
 - Intelligence
- 3.8 Psychiatric & Behavioral Disorders
 - Psychiatric Illness
 - Antisocial Personality: An Extreme High-Risk Personality Type
 - Alcohol & Drug Abuse
- 3.9 Nature or Nurture?
- 3.10 Behavioral History & Indicators
 - Driving Experience & Longevity with Company
 - Safety History
 - ATRI Driver Behavior-Based Crash Prediction Study
 - COMMENTARY: Dr. Brenda Lantz, NDSU; *What Driver Records Tell Us*
 - Non-Driving Behavioral History
- 3.11 Interaction with Temporary & Situational Factors
- 3.12 Implications for Management
 - Importance of Driver Selection & Evaluation
 - Management Interventions to Change Behavior

(4) Driver Error [44 pages]

- 4.1 Categories & Types of Errors
 - Critical Events, Critical Errors, & Associated Factors
 - Indiana/LTCCS Driver Error Classification Scheme
- 4.2 LTCCS Findings on Driver Error
 - Three Broad Crash Categories
 - Critical Events in Crashes
 - Critical Driver Errors (Critical Reasons)
 - Associated Factors
- 4.3 Naturalistic Driving Findings
- 4.4 Misbehaviors vs. Mistakes as Crash Causes
 - Misbehaviors, Mistakes, & the Indiana/LTCCS Categories
 - Importance & Usefulness of the Misbehavior-Mistake Distinction
 - Relation to Crash Severity
- 4.5 The Ubiquitous Misbehavior: Speeding
- 4.6 The Ubiquitous Mistake: Inattention
 - Human Attention & Mental Workload
 - Types & Modes of Inattention
 - Sources of Inattention
 - COMMENTARY: Dr. Rich Hanowski, VTTI; *When Driving, Vision is King*
 - Inattention as *the* Major Precipitator of Crashes
 - Improving Attention to Driving
- 4.7 The “Crash Trifecta”
 - Convergence of Events
 - The Crash Trifecta as a “Swiss Cheese” Error Model
 - The Crash Trifecta as a Math Model for Prevention

(5) Driver Fatigue [68 pages]

- 5.1 Driver Fatigue: The Elephant in the Room?
- 5.2 Characteristics of Driver Fatigue & Fatigue Crashes
 - Alertness is Fundamental to Performance
 - Objective Measures of Sleepiness
 - Subjective Self-Assessments
 - Profile of Fatigue Crashes
- 5.3 How Many Crashes?
 - NTSB Studies of Truck Driver Fatigue: Misleading?
 - Best Estimates: Percent of Truck Crashes Related Primarily to Fatigue
 - Other Factors & Perspectives on the Fatigue Crash Problem Size
 - Driver Fatigue & Other Crash Causes
- 5.4 Differential Driver Risk: Fatigue Susceptibility
 - Naturalistic Driving Evidence: Individual Differences in Susceptibility
 - Individual Differences in Response to Sleep Deprivation
 - Individual Differences in Self-Awareness of Fatigue
- 5.5 The Alertness Rollercoaster: Temporal Factors Affecting Fatigue & Alertness
 - Alertness Switches
 - Personal Risk Factors for Fatigue
 - Time-of-day [circadian rhythm]
 - Amount of sleep
 - Time Awake
 - Time working & driving (time-on-task)
 - Day-of-week (work day during multi-day trips & work weeks)
 - Sleep-Performance Models & the Actigraph
 - COMMENTARY: Dr. Greg Belenky, Washington State Univ.; *Interacting Factors That Increase Fatigue*
 - Interaction: Individual Susceptibility & Temporal Factors
- 5.6 Hours-of-Service & Fatigue
 - Current & past HOS rules
 - Do HOS rules reduce fatigue?

- 5.7 Improving Driver Sleep & Alertness
 - COMMENTARY: Dr. Jerry Krueger, Krueger Ergonomic Consulting; *Hints for Healthy, Fit Commercial Drivers*

(6) 4-Wheelers [32 pages]

- 6.1 Relative Harm in Car-Truck Crashes
- 6.2 Relative Fault in Car-Truck Crashes
 - Fault distribution in fatal crashes
 - Factors affecting fault distribution
- 6.3 4-Wheeler Actions & Errors Causing Crashes
 - LTCCS Statistics: Critical Events, Reasons, & Associated Factors
 - Other Studies of 4-Wheeler Errors
- 6.4 Large Trucks in the Greater Context of Traffic Safety
 - It's not about you . . .
 - Changing 4-wheeler behavior: easy as PIE?
 - COMMENTARY: Dr. Leonard Evans; Science Serving Society; *Driver Behavior, Traffic Safety, & Truck Safety*
- 6.5 Defensive Truck Driving
 - Offensive driving & defensive driving
 - The crash trifecta & defensive driving
 - Recommended practices
 - COMMENTARY: Larry Shelton, America's Road Team (Driving Proactively & Defensively)

(7) Vehicle Design & Technologies [62 pages]

- 7.1 Vehicle Safety: More Important for Trucks than Cars
 - Risk & Opportunity
 - Vehicle Condition & Crashes
 - COMMENTARY: Dan Blower, UMTRI; *Maintain Key Truck Systems for Safety*
 - Vehicle Maintenance Strategies
 - Cargo Securement
- 7.2 Large Truck Braking & Stability
 - The role of brakes in truck crashes
 - Brake design features and enhancements
 - Electronic Stability Control
- 7.3 Visibility
 - Truck Mirrors
 - Video "Mirror" Systems
- 7.4 Conspicuity
- 7.5 Collision Warning Systems
 - Overview of Collision Warning Systems
 - Forward Collision Warnings
 - Rear-Object Detection Systems (RODS)
 - Side-Object Detection Systems (SODS)
 - Lane Departure Warning Systems (LDWS) & Lane-Tracking
 - Rollover Warnings & Control
 - Integrated Vehicle-Based Safety Systems (IVBSS)
 - Cooperative Vehicle-Infrastructure Systems
- 7.6 Electronic Onboard Recorders (EOBRs)
- 7.7 Driver Behavior Monitoring Systems
 - Technological Aids to Driver Behavior Change and Management
 - Does One Type of Risky Behavior Indicate Others?
 - Aids, Not Threats
 - Driver behavioral adaptation
 - The need for *total* OBSM systems
 - EDRs and in-vehicle video cameras
- 7.8 The Promise of Alertness Monitoring
 - Alertness Monitoring Concepts

- Coming: The “Alertometer” Revolution
- 7.9 Automated Transmissions & Monitors
 - Automated transmissions & safety
 - Tire Pressure Monitors
- 7.10 Speed Limiters
- 7.11 Carrier Adoption of New Technologies
 - Appreciating the benefits of safety
 - Making safety technology work for companies and drivers
 - Promoting safety technologies nationally.
 - COMMENTARY: Steve Williams, Maverick USA, Inc.; *Visionary Thinking Means Embracing Technology*

(8) The Roadway & Traffic Environment [32 pages]

- 8.1 Problematic Aspects of Truck & Roadway Design
 - Truck Characteristics Relevant to Roadways
 - Roadway Features Relevant to Trucks
 - Curves & Ramps
 - Grades
- 8.2 Undivided Highways
 - Naturalistic Driving & LTCCS Data
 - A Speed Paradox
- 8.3 Work Zones
- 8.4 Dense Traffic & Rush Hours
- 8.5 Night Driving
 - Truck & Car Mileage Exposure by Time-of-Day
 - Crash Risk by Time-of-Day
 - Naturalistic Driving Data on Risk by Time-of-Day
 - Conclusions Regarding Night Driving
- 8.6 Adverse Weather
- 8.7 Road Policies Relevant to Trucks
 - Speed Limits & Highway Speeds
 - Differential Car-Truck Speed Limits
 - Lane Restrictions
 - Rest Parking
- 8.8 Infrastructure & Safety

(9) Focus: Selected Crash Types [38 pages]

- 9.1 Road Departure Crashes
 - Causal Scenarios
 - Road Departure Countermeasures
- 9.2 Head-On Crashes
 - Causal Scenarios
 - Head-On Crash Countermeasures
- 9.3 Rollovers
 - Causal Scenarios
 - Rollover Countermeasures
 - COMMENTARY: Doug Pape, Battelle; *Reduce Rollovers with Electronic Stability.*
- 9.4 Jackknives
 - Causal Scenarios
 - Jackknife Countermeasures
- 9.5 Rear-End Crashes
 - RE-LVS Causal Scenarios
 - RE-LVM Causal Scenarios
 - Rear-End Crash Countermeasures
- 9.6 Lane Change/Merge Crashes
 - Causal Scenarios
 - LC/M Crash Countermeasures

- 9.7 Backing Crashes
 - Causal Scenarios
 - Backing Crash Countermeasures
 - 9.8 Crossing-path Collisions
 - Causal Scenarios
 - Crossing-path Crash Countermeasures
- (10) Carrier Safety Management [52 pages]
- 10.1 Safety Problems Managers Must Address
 - 10.2 Overview: Safety Management Practices & Goals
 - COMMENTARY: Dave Parker, Great West; *Carrier Safety: An Insurance Company Perspective*
 - 10.3 Driver Recruiting & Selection
 - Selection Ratings & On-Job Performance
 - Selection Ratio & Driver Quality
 - Recruiting & Selection Methods & Criteria
 - Improving Methods & Selection Accuracy
 - Summary: Multiple Ways to Improve Hiring
 - 10.4 Driver Training
 - School Training & The New CDL Skills Test
 - Carrier-Based “Finishing”
 - Refresher/Remedial Training & Safety Meetings
 - Driving Simulators
 - 10.5 Driver & Carrier Safety Evaluation
 - Evaluating Individual Driver Safety
 - Crash Investigation & Follow-Up
 - Fleet Safety Measures
 - U.S. DOT Metrics for Carrier Safety
 - 10.6 Behavior-Based Safety Management
 - Activators: Cues & Prompts to Initiate Desired Behaviors
 - Behaviors: Identifying Safety Behaviors to Target
 - Consequences: Rewards & Punishments
 - 10.7 A Management-Driver Safety Performance Matrix
 - 10.8 Safety Culture & Management Professionalism
 - Management Principles, Practices, & Culture
 - Professional Development & Certification for Managers
 - COMMENTARY: Bob Inderbitzen, REI Consulting & NPTC; *A Personal Commitment to Safety Professionalism*
- (11) Special Topics in Carrier Operations & Safety [48 pages]
- 11.1 Type of Carrier Operation
 - For-Hire Segment: Truckload & LTL
 - Private Carriage
 - Industry Segments & Safety Performance
 - 11.2 Truck Type & Size
 - CTs & STs
 - Longer Combination Vehicles (LCVs)
 - 11.3 Driver Retention
 - Company Factors in Retention
 - Retention & Safety
 - COMMENTARY: Don Osterberg, Schneider National; *Job Value and Driver Retention*
 - 11.4 Driver Pay
 - 11.5 Increasing Safety Belt Use
 - Safety Belts & Truck Safety
 - Non-Belt Use: A “Red Flag” for Driver Risk
 - Management Practices to Increase Belt Use
 - 11.6 Reducing Non-Driving Injuries
 - Non-Driving Injuries Outnumber Driving Injuries

- Slips & Falls
- Other Non-Driving Injuries & Rules to Prevent Them
- 11.7 Team Driving
 - Safety of Team Driving
 - Sleeper Berth Naturalistic Driving Study
 - Stop the Truck?
 - Managing Teams
- 11.8 Dispatching Policies & Practices
 - Scheduling Practices to Reduce Fatigue & Traffic Interactions
 - Risk Interaction & Optimizing Driver Route Assignments
 - When Possible, Assign Familiar Routes.

(12) What About Regulation, Enforcement, & Compliance? [46 pages]

- 12.1 A Compliance Hierarchy
- 12.2 Regulatory Enforcement I: Basic Concepts
- 12.3 Regulatory Enforcement II: Efficient & Strategic Enforcement
 - Systems & Metrics for Targeting Enforcement
 - Innovations
 - COMMENTARY: Steve Keppler, CVSA; *Technology, Data, Performance and Innovation -- the Next Great Frontiers for Safety*
- 12.4 Traffic Enforcement
 - MCSAP Traffic Enforcement
 - Traffic Enforcement & Behavior Change
- 12.5 The Limitations of Enforcement
 - Inputs vs. Outputs & Outcomes
 - Violations & Crashes: Reciprocal Relevance?
- 12.6 Alternative Compliance Schemes
 - Moving the Curve
 - Compliance with Insurance Requirements
 - Chain of Responsibility?
 - Safety Certification & Benchmarking
 - Fatigue Management Programs
- 12.7 Government-Industry Cooperation
 - Cooperative Compliance
 - Safety Education & Consultation
 - Regulatory Incentives
 - COMMENTARY: Roger Clarke, Alberta Transportation; *Making "Beyond Compliance" a Reality*

(13) Beyond Compliance [44 pages]

- 13.1 From Compliance to Active Safety
 - What is Active Safety?
 - The Business Model
 - Self-Management
 - Organizational Commitment & Quality
 - COMMENTARY: Peter Kissinger, AAA Safety Foundation; *Safety Culture: Putting the Brakes on the Nation's Complacency*
- 13.2 Targeting High-Risk Drivers
 - Government & Industry Level
 - Carrier Level
- 13.3 Sustaining Good Drivers
 - The Safety Mountain
 - Recognitions & Rewards
 - Education, Job Enrichment, & Professional Advancement
 - Health, Wellness, & Lifestyle
 - Three Words for Drivers
- 13.4 Risk Avoidance
 - Operational Strategies

- Highway Infrastructure & Policies
- 13.5 Advanced Countermeasures
 - Onboard Technologies
 - Intensified Traffic Enforcement
- 13.6 Going Forward
 - Multifarious Problems and Solutions
 - Safety Actualization
 - COMMENTARY: Dave Osiecki, ATA; *The Motivators of Carrier and Driver Safety*

Back Matter:

- Acknowledgements
- Biographies of Expert Commentators + “About the Author”
- Glossary
- Frequently Used Acronyms
- Cited References
- Truck Safety-Related Websites
- Subject Index.

Expert Commentaries:

- Dr. Greg Belenky, Washington State University; *Interacting Factors That Increase Fatigue* (Chapter 5)
- Dan Blower, UMTRI; *Maintain Key Truck Systems for Safety* (7)
- Roger Clarke, Alberta Transportation; *Making “Beyond Compliance” a Reality* (12)
- Dr. Leonard Evans, Science Serving Society; *Driver Behavior, Traffic Safety, & Truck Safety* (6)
- Governor Bill Graves, ATA; *ATA’s Commitment to Safety* (1)
- Dr. Rich Hanowski, VTTI; *When Driving, Vision is King* (4)
- Bob Inderbitzen, REI Safety Services; *A Personal Commitment to Safety Professionalism* (10)
- Steve Keppler, CVSA; *Technology, Data, Performance and Innovation -- the Next Great Frontiers for Safety* (12)
- Peter Kissinger, AAA Safety Foundation; *Safety Culture: Putting the Brakes on the Nation’s Complacency* (13)
- Dr. Jerry Krueger, Krueger Ergonomic Consulting; *Hints for Healthy, Fit Commercial Drivers* (5)
- Gordon Lambert, C. R. England; *Putting Safety Research and Statistics to Work* (2)
- Dr. Brenda Lantz, NDSU; *What Driver Records Tell Us* (3)
- Dave Osiecki, ATA; *The Motivators of Carrier and Driver Safety* (13)
- Don Osterberg, Schneider National; *Job Value and Driver Retention* (11)
- Doug Pape, Battelle; *Reduce Rollovers with Electronic Stability* (9)
- Dave Parker, Great West; *Carrier Safety: An Insurance Company Perspective* (10)
- Larry Shelton, Old Dominion Freight Lines & America’s Road Team; *Defensive Driving* (6)
- Steve Williams, Maverick USA, Inc.; *Visionary Thinking Means Embracing Technology* (7)
